

IN THE SPECIFICATION

Please amend the specification as follows:

At page 4 of the original application, third full paragraph on page 4 corresponding to paragraph [0015] of the published application, please amend the paragraph as follows:

[0015] FIG. 1 shows a battery pack module 2 inserted longitudinal to a direction of insertion A into a housing part 1 of a hand tool machine (not shown) having two leaf springs 4 arranged on opposite sides of a module housing 3, oriented opposite each other and transverse to the direction of insertion A, said leaf springs 4 comprising thin spring steel, which outwardly ~~spring-biased~~ spring-bias latching hooks 5 with finger pressure surfaces 6. The right latching hook 5 is in the resting position I, the left latching hook 5 is in the released position II. The respective leaf spring 4 that is unilaterally connected with the module housing 3 extends over a longitudinal zone X of the finger pressure surfaces 6.
